

A photograph of a ceiling with several square tiles. One large section of the ceiling is covered by tiles featuring a vibrant autumn scene with trees in shades of orange, yellow, and red against a clear blue sky. The surrounding tiles are standard white acoustic tiles, some of which have integrated rectangular fluorescent light fixtures.

DECORATIVE
CEILING TILES

COLOURPOINT 

Transform boring offices into beautiful havens

Transform your office for the better - with printed ceiling tiles to enhance your workspace

These printed ceiling tiles will brighten up any office and will introduce a calmer and more balanced working environment.

Ceiling tiles, also known as ceiling panels, are lightweight construction materials, which are used to cover ceilings typically in office environments.

Placed in an aluminium grid, as a suspended ceiling, they provide some thermal insulation but are usually designed to improve the aesthetics and acoustics of a room or office.

We can print as single tiles (with different images) or as a group of tiles, one image that is made up of 2 or more tiles. Blocks of 9 tiles works extremely well as does 18, it really depends on the office size, the ceiling layout and the lighting and air-conditioning units' positioning, which will all need to be taken into consideration.

Whether you choose from our wide and varied selection of beautiful images or supply us with your own choice of images or logos, the only limitation will be the image resolution which will need to be high quality, at least 600dpi, to give you a quality finish.

A little technical info on how we print,
and what is possible.

The tiles are printed on our 6-color Anapurna M2500i hybrid wide-format printer. A more accurate dot positioning, an enhanced curing system and higher performing print heads make the Anapurna M2500i into a heavy-duty, turnkey and complete UV inkjet system. This allows us to print high quality images to any substrate that is up to 50mm thick and no more than 2,500mm wide, so perfect for ceiling tiles! The UV inks we use are highly durable and water resistant.

Below are the most standard / common ceiling
tile sizes for suspended ceilings:

These sizes will vary between offices, based on
the size of the space and the office specification.

600 x 600mm (595 x 595mm)

1200 x 600mm (1195 x 595mm)

1800 x 600mm (1795 x 595mm)

We are able to print on any of the above sizes.
